

**Q&A Addendum – Post-Transcript  
UAF Athletics Security Products  
RFP 638815**

**This document provides question and answer information pertaining to the above captioned RFP as received and addressed after release of the Facility Tour Transcript.**

**REMINDER:** It is the Respondent's responsibility to thoroughly examine and read the entire RFP document and any appendices and addenda to this RFP.

**Posted May 23, 2017**

**Question:** Typical and maximum throughput numbers for each gate/entrance. Is this available from historical ticket scan data?

**Answer:** For safety and security reasons, the information requested here will be distributed directly to potential bidders that participated in the on-site tour. The information must be kept confidential among potential bidders.

**Question:** Proposals may contain quite a bit of information regarding our products and their current use at other venues. Will this information be only shared with members of the UAR evaluation team or will other bidders be allowed to request copies?

**Answer:** Anything you wish to keep confidential (except for cost), please provide in a separate envelope labeled accordingly. Refer to specific sections in the 12-page Standard Terms and Conditions document as posted on Hogbid - **Additional Redacted Copy** (page 4 of 12), and **Proprietary Information** (page 5 of 12). These sections explain how the confidential information should be packaged and labeled for submittal within your proposal. They also outline the FOIA stipulations and how that applies. Typically, and in compliance with Arkansas law, we do not release *any* information to any requestor during the RFP process that could be considered a potential competitive disadvantage.

**Question:** Will the newly constructed North End Zone gate be sheltered like the rest of the gates or will it be out in the open?

**Answer:** Partially covered.
