

RFP02292024 – Athletics Video Board Processing, CMS, and Clip Playback Upgrades

TENNIS ADDENDUM

We are adding one additional display to the scope of this RFP. There is a small display at our indoor tennis facility that currently has no CMS. We need to display tennis scores from DakTennis and possibly some ads. The same requirements will apply. No Scaling or KVM transmitters are required for this addition as there will be no live video displayed. Daktronics will also upgrade the processing on this display.

Dimensions: 216x108
